Features of Oita City's Onsen (Deep Subterranean Thermal Springs)

After the bath your skin

will be silky smooth!

A unique sweet fragrance and

The hot springs in Oita City originate from deep subterranean thermal springs located 600 to 800 meters below the earth's surface. The color of the hot springs can vary from amber to black due to ancient deposits of plant matter and the presence of that ng soft and reiuvenated for who tak effects on your skin! Additionally, recent research has shown that these mineral-rich deep subterranean thermal springs contain helium and carbon dioxide gas, which are commonly found deep beneath the earth's surface
